PROFESSIONAL SUMMARY

I am a Data Analyst with about three years of experience in transforming complex datasets into key performing insights. I have worked on a project to improve operational efficiency by 15% through data-driven solutions. I am skilled in Python, SQL, and data visualization tools to build predictive models and dashboards that inform strategic decisions. I have strong background in machine learning and ETL pipelines with hands-on experience in customer behavior analysis and trend forecasting.

TECHNICAL SKILLS

Programming: Python (Intermediate), SQL (Intermediate).

Data Analysis: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.

Tools: Microsoft Excel, GitHub, Jupyter Notebooks.

Methods: Predictive Modeling, Data Mining, ETL Pipelines, Machine Learning.

PROFESSIONAL EXPERIENCE

Data Processing Teacher (NYSC) | April 2024 – April 2025
Anglican Commercial Senior Secondary School, Ibadan, Oyo State.

- Instructed over 80+ senior secondary students in core Data Processing concepts including Microsoft Excel, Access, file organization techniques, database creation, and spreadsheet functions, fostering analytical thinking and digital literacy.
- Delivered structured practical sessions in the computer laboratory, guiding students through hands-on use of spreadsheet formulas, data sorting, and electronic file management, in line with national curriculum standards.

Ramitech Global Resources | Data Analyst Intern | October 2020 – February 2021

- Cleaned and transformed operational data using Python and SQL, improving data reliability by 20%.

- Analyzed system performance datasets, identifying inefficiencies that led to 15% performance improvement.
 - Developed interactive dashboards in Excel and Python to visualize key metrics for stakeholders.
 - Automated routine data extraction processes, reducing manual work by 10 hours/week.
-

EDUCATION

B.Eng. Computer Engineering (First Class Honors)

Olabisi Onabanjo University | October 2017 – July 2023

CERTIFICATIONS

British Airways Data Science Simulation | Forage | December 2024 | [Certification](#)

Accenture Data Analytics Simulation | Forage | December 2024 | [Certification](#)

Applied Data Science Lab | WorldQuant University | August 2023 | [Certification](#)

PROJECTS

Exploratory Data Analysis (EDA) on Retail Sales Data | [Link](#)

Oasis Infobyte Internship Project

- Analyzed 1,000 retail sales records to uncover patterns in customer demographics, seasonal trends, and product category performance.
- Cleaned and structured raw data, then visualized key insights using Matplotlib & Seaborn, improving data interpretability for stakeholders.
- Discovered that electronics had the highest purchase volume and that customers aged 25–40, particularly females, were the most active buyers.
- Generated actionable insights on sales fluctuations across months and quarters to guide business decisions.

British Airways Customer Review Analysis | [Link](#)

Data Analytics Project | (Python, Excel, Web Scraping)

- Scraped and analyzed over 3,000 British Airways customer reviews using Python (BeautifulSoup, Requests, Pandas).
- Conducted sentiment analysis using NLTK's VADER to classify reviews into positive, neutral, and negative sentiments.

- Utilized Excel to clean, process, and visualize data on traveler types, seat preferences, review sentiment, and trip verification status.
- Discovered that only 35% of reviewers recommended the airline, with a strong correlation between negative sentiment and non-verified trips.

LEADERSHIP & VOLUNTEERING

Academic Director | Muslim Students Society of Nigeria | June 2021 – July 2022

- I led academic tutorials for 100+ students.
- I organized inter-faculty knowledge sharing programs.

Health Prefect | Saint Anthony Grammar School | April 2014 – March 2015

- Conducted hygiene awareness campaigns for 500+ students during my O'level studies.
